

2021-2022 Carolina Springs Middle School Suggested School Supplies

At Carolina Springs Middle School we believe that now - more than ever - we must teach students organizational skills to empower them to have control over their path of learning.

Research shows that organizational skills can have a powerful impact on student success both inside and outside of the classroom. Organizational skills increase a child's ability to complete assignments, reflect on their own understanding, and build their confidence in the ability to understand content.

Thank you for helping us equip your child with the organizational tools he/she needs.
